Oddington's New and Standard ROSES 1931

L. B. CODDINGTON

Grower and Hybridizer
MURRAY HILL, NEW JERSEY

About Ourselves..

URRAY HILL adjoins Summit, New Jersey. It is on the Lackawanna Railroad. Our office and greenhouses are but a short distance from the station. It is on good roads from all points in New Jersey.

Our business was established in 1895 and has grown until we are now one of the largest growers of roses in the East.

We have 40 greenhouses, the largest being 61 feet wide and 500 feet long, 600,000 square feet of glass. We have produced and sent to market six million roses in a year.

We operate our own water system and a very large refrigerating plant.

We are the originators of the new Roses, President Hoover, Mrs. Herbert Hoover and Autumn.

Thousands of new Roses are produced annually at a great expense in an effort to give rose lovers better, more beautiful flowers. None are considered worth-while unless superior to any now in cultivation.

PRICES

Except as noted in list

Single	Plant	\$.50
6		 2.50
12		 4.00
25		 7.00
50		 12.00
100		 20.00

Special prices on 1,000 or more

All plants at above prices are delivered prepaid east of the Mississippi River. West of that dividing line of the country, add for postage as follows: 1 plant, 10 cts.; 12, 35 cts.; 25, 70 cts.; 50, \$1.20; 100, \$2.00.

We have placed the additional cost of delivery charge to western points considerably less than we expect it to be.

PRESIDENT HOOVER

This beautiful Rose is the winner of four American gold medals and two high foreign honors.

Gold Medals were awarded the President Hoover Rose at the International Flower Show, March, 1929; at the New Jersey Flower Show, November, 1929; by the Massachusetts Horticultural Society, March, 1930 and the American Rose Society, in 1930.

President Hoover Rose also received from the Royal Horticultural Society of London, England, a certificate of merit and from the great rose exhibit at Barcelona, Spain, where roses grow to wonderful perfection.

The buds are large and long pointed. The flowers are large and very lasting and quite fragrant. The color is difficult to describe, being a delightful combination of rose, bronze and yellow. The plants are of vigorous, upright growth and flower prolifically. The foliage is attractive and disease resistant. A colored plate about natural size appeared as a frontispiece in the 1930 Annual of the American Rose Society.

Strong Plants, \$1.00 each; 12 plants, \$10.00; 100, \$60.00.

MRS. HERBERT HOOVER

This is one of the finest crimson roses, a rich velvety, dark red. The bud is long pointed and the double flowers are of medium size, intensely fragrant on long stems. Foliage is lustrous dark green, disease resistant. The plants bloom continuously. Awarded silver medals at the International Flower Show, New York and New Jersey Flower Show. Price \$1.50. Per dozen \$15.00.

AUTUMN

The flowers are of fine form, and endure much handling, a wonderful combination of crimson-scarlet and yellow. No other rose in the world like it. Florists find it in great demand by their customers where it is known. Awarded silver medals by the American Rose Society and International Flower Show, New York, 1930. Price \$1.50 each. Per dozen, \$15.00.

STANDARD VARIETIES BRIARCLIFF

A sport of Columbia, retaining all the good qualities of its parent, color more brilliant, being a true rosepink, without any shading whatever. Long pointed bud. Very fragrant.

MME. BUTTERFLY

This rose has been called a glorified Ophelia. Long pointed buds opening to double flowers, salmon-flesh on long stems. A beautiful, dainty rose. Probably the best all around blooming rose there is.

RAPTURE

An exquisite salmon shade, deeper than Mme Butterfly. Golden flush at base of petals.

SOUV. de CLAUDIUS PERNET

Large pointed buds, opening to large fragrant full double flowers of pure yellow, on long stems. This is considered the triumph of Pernet, the great French rosarian.

TIME OF DELIVERY

We begin filling orders as soon as our conditions allow, usually about the middle of May, in the latitude of New York, filling orders in rotation as far as possible and practicable.

Give full and complete address and shipping or delivery instructions. We try to deliver by truck within reasonable distance of Murray Hill.

We are closed for business all day Sunday.

· **

TO CARRY THE PLANTS THROUGH THE WINTER WE RECOMMEND THE FOLLOWING SIMPLE METHOD:

Before the ground is frozen too hard, usually about the middle of November, procure some rough straw or litter, or branches of evergreens, or dried leaves and put around the lower parts of plants, to a height of about one foot. Cover this with a little soil to prevent the wind from blowing it away. In the Spring remove this and cut away the wood killed by frost, giving a mulching of well-rotted manure.

The plants are ready for planting as received, but can be pruned back a little more if so desired. Plant firmly, and water as conditions of soil and weather make it advisable.
